

ALBILEX[®] - Biostat – Effective substance to combat algae

Employment Method

Highly effective substance to combat algae on facades, in water tanks, cooling-circulation-systems and swimming pools. For the renovation and conservation of facades, these have to be washed with ALBILEX[®]-Biostat, using a 1% solution (approx. 100 ml for a bucket of water). The agent, which is not rinsed off, remains on the facades, prevents a new attack by fungi and contamination with, algae and moss. In order to avoid the contamination of water tanks or cooling circulation systems, the addition of 20-30ml ALBILEX[®]-Biostat in 10 litres of water is sufficient. CAUTION: Keep ALBILEX[®]-Biostat away from drinking water.

Ingredients

ALBILEX[®]-Biostat contains a cationic wetting agent. All components are easily degradable in a biological sewage plant if they have been sufficiently diluted.

Delivery Form

ALBILEX[®]-Biostat can be supplied in 1 kg and 30 kg cans or containers.

Further information

ALBILEX[®]-Biostat is not a dangerous substance in the sense of the Chemicals Act or a hazardous freight according to transportation rules. It has been categorised as a second class water pollutant. In case of contact with eye or skin, rinse with plenty of water. Please keep away from children.
