

ALBILEX® - Neutralizer

ALBILEX®-Neutralizer serves for balancing-out acid cleaning agents or cleaning sumps before being led into the sewerage.

Application

ALBILEX®-Neutralizer is added to the diluted cleaning agent till a pH-value between 6.5 – 9.0 is reached. In order to control the pH-value it is recommended to use pH indicator paper. ALBILEX®-Neutralizer should not be mixed with acid cleaning concentrates.

Applicable quantities for balancing-out ALBILEX®-3000:

pH value of the sewage	Quantity of ALBILEX®-Neutralizer per cbm ALBILEX®-3000-sewage
2.0	3,600.00 g
3.0	360.00 g
4.0	36.00 g
5.0	3.60 g
6.0	0.36 g

A maximum of 185g ALBILEX®-Neutralizer is necessary for balancing out one kg of ALBILEX®-3000.

Additional information
